Summary

Aspiring web designer with a passion for the arts. Background in music education developed prominent skills: a passion to achieve, creatively capturing the attention of the community, working both individually and as a group, organizing and achieving goals for the short and long term. Persisting through challenges with optimism to accomplish learning HTML, CSS, and JavaScript through Northwestern's Coding Bootcamp. Ready and ambitious to create a career in web design.

Technical Skills

- Proficient with Google suite and Microsoft Office, HTML5, CSS, JavaScript

Projects

Train Scheduler   Live - https://acepela5.github.io/TrainScheduler/ | Github - acepela5/TrainScheduler
- Designed an app for adding trains to a master database. Table is created dynamically with information input by the user. Train times update showing the next arrival time and how many minutes away.
- **Tools used**: HTML5, CSS, JQuery, Moment, Firebase

Liri Node App   Github - acepela5/Liri-node-app
- App is designed for backend use. It allows the user to search through Spotify for song information, BandsInTown for concert information, and IMDB for movie information using APIs. User input is recorded in a separate file in case they would like to review past results.
- **Tools used**: JQuery, Node, API, Moment, .env, JSON, Axios

WonderlandGame   Live - https://acepela5.github.io/Wonderland/ | Github - acepela5/Unit-4-Game
- A short game where the user must reach the computer's randomly generated number by clicking on four images. Each image is worth a secret amount that changes every round of the game. If the player reaches the computer number, they win, but if they go over they lose.
- **Tools used**: HTML5, CSS, JavaScript
